J.K. Rowling's Net Worth

According to *The Sunday Times* 2017 Rich List, J.K. Rowling's net worth is £650 million (about \$850 million) — making her wealthier than even [Queen Elizabeth II](#). *Forbes* put her wealth at \$650 million in 2017, in large part due to the 450 million copies of *Harry Potter* sold to-date and the subsequent movie franchise that has grossed \$7.7 billion. (Her worth would've been more in *Forbes* if it were not for the \$150 million she has donated to various charities.) In the first half of 2017, Rowling took home an estimated \$95 million thanks to her new play, *Harry Potter and the Cursed Child*, and movie, *Fantastic Beasts and Where to Find Them*.

BUYERS...THIS IS YOUR TIME!

There are so many advantages for one to purchase a home or a building lot at this time. We still have low prices, good solid inventory, and great programs for the first-time homebuyer. The time really is NOW!

Our professional and knowledgeable staff will help you find the perfect home for you and your family. We will gladly help you from the first step of pre-qualifying for a loan, to finding a home that fits your needs, to negotiating the purchase agreement with you, to handling needed inspections, and on to the actual closing.

INVESTORS

We have all seen this before...and it's starting again. The land prices are still stable, however, they are beginning to rise.

Are we in for another major real estate expansion? It certainly seems so, perhaps not as volatile as was the '05 era, but there are an awful lot of Baby Boomers chafing at the bit to get to the warm winters of Florida and when they start...well, you know what will happen to the land prices. We were there before, during and after that last expansion, as well as the prior two, which were decades ago. There is little doubt that we will once again need our land investor groups to supply that demand for the public, but more so, for our land hungry home builder clients.

Facebook Buys Instagram for \$1 Billion

By EVELYN M. RUSLI APRIL 9, 2012 1:15 PM 36

2:02 p.m. | Updated

Facebook is not waiting for its initial public offering to make its first big purchase.

In its largest acquisition to date, the social network has purchased Instagram, the popular photo-sharing application, for about \$1 billion in cash and stock, the company said Monday.

It's a notable move for Facebook, which has exclusively focused on bite-size acquisitions, worth less than \$100 million.

Instagram released a version of its application for [Google's](#) Android operating system last week.

On Monday, both companies expressed their commitment to run Instagram as an independent service.
